Objective

MCA student and dedicated Web Developer with strong proficiency in JavaScript, React.js, and SQL.Demonstrated expertise in developing full-stack applications and RESTful APIs with an emphasis on scalability, performance, and maintainable code. Demonstrates initiative by strategically designing responsive user interfaces and optimizing backend systems with meticulous attention to detail. Recognized as the winner of VIZCRAFT, organized by the Business Analyst Forum at MIT-WPU (School of Business).

Skills

- Programming Languages: JavaScript, Java (Basics), NodeJs C++, OOPs
- Frameworks / Libraries: React.js, React Router, Redux, Material UI, NextJs
- Web Technology: HTML, CSS, Tailwind CSS, Bootstrap
- Mobile App Development : Android Development (Java)
- Database: Firebase, MongoDB, MySQL
- Tools & Version Control: Git, GitHub, VS Code, redux toolkit, Android Studio
- Deployment: Netlify, Vercel
- Other Skills: Figma ,UI/UX Design, RESTful APIs

Education

Master of Computer Applications (MCA)

(August 2024 - present)

- MIT-World Peace University
- CGPA: 7.55

Bachelors in Computer Applications (BCA)

(June 2021- April 2024)

- Savitribai Phule Pune University (SPPU)
- CGPA: 7.5

Soft Skills

- Strong problem-solving and analytical skills.
- · Good communication and teamwork abilities.
- Passion for learning new technologies.
- · Ability to adapt and contribute in a fast-paced environment.

PROJECTS

- MovieLoom
- Tech Stack: MERN Stack
 - Developed a full-stack movie discovery platform with React.js, Node.js, Express, and MongoDB.
 - Implemented intuitive UI for browsing and searching movies with multimedia content.
 - Optimized API endpoints to ensure smooth performance and enhance user engagement.
- GoFlow Carpooling Mobile Application
 - Tech Stack: Android (Java), Firebase
 - Built an Android app for ride-sharing with features like user authentication, ride booking, in-app wallet, and referral rewards
 - Integrated Firebase for login and Firestore for user activity; used for backend and UPI APIs for payments.
 - Designed a normalized relational database and developed a responsive, user-friendly UI in Android Studio.
- E-Commerce Website
- Tech Stack: HTML, CSS, JavaScript, React.js
 - Built a responsive online shopping platform with product catalog, search filters, and cart functionality.
 - Enhanced user experience through a seamless and interactive frontend interface.

Training & Certifications

- Bluepineapple Campus Connect Program
- Duration: (Jan 2025 Mar 2025)
- Completed comprehensive training in problem-solving, competitive programming, and data structures and algorithms (DSA) using Java and C++.
- Covered core topics including arrays, linked lists, stacks, queues, trees, graphs, and dynamic programming.
- React.js Infosys Springboard

(November 30, 2024)

Frontend Software Engineering - Skyscanner

(February 15, 2025)

Achievements

- Recognized as the winner of VIZCRAFT, organized by the Business Analyst Forum at MIT-WPU (School of Business).
- Bootcamp on AR/VR CDAC (Centre for Development of Advanced Computing)

Extra- Curricular Activities

• Volunteer, RIDE Event - MIT-WPU

Supported event operations and logistics for RIDE (Research, Innovation, Development & Entrepreneurship) Assisted participants and managed registration and feedback

Cricket Team Member, Department/College Level

Represented department in inter-college tournaments

Developed teamwork and strategic thinking
